

# MASS

'MASS' an apartment block

This is apartment block 'MASS' in a city. The word, 'MASS' has 2 meanings in both English and Japanese. One meaning is amount of something in English, the other is square in Japanese. It is difficult to communicate with neighbours in such a big city, however, the inhabitant can get a sense of solidarity in this apartment house from their optic angle, such as shape and colour. It will be a trigger in establishing relationships with neighbours.

There are 80 houses in 'MASS'. The 4 surface exterior walls are painted with 4 colours, red, blue, green and yellow. This is because the 80 houses are divided into 4 towers, so it notices the former shape.

In addition, the grass pattern is how the 'MASS' is divided into 4. The corridors of each tower are made with transparent and translucent material. This may help to prevent crimes that may happen in apartment blocks. In addition, the light from each house goes through the material and gives us a nice lighting effect.
